

The Longitude and Latitude of the Night Sky: Declination & Right Ascension

How do we find objects in the night sky?

Right Ascension:
Write in the correct hours, minutes, seconds for RA (Right Ascension) in the boxes provided. Remember that RA is similar to our longitude on the earth's surface.

Declination:
Write in the correct "+" or "-" degree in the boxes for declination. Remember that declination is similar to our latitude degrees on the earth's surface.
